

## Walking in the footsteps of Mary Gillham

*A Dedicated Naturalist: The Dr Mary Gillham Archive Project* is a Heritage Lottery Funded project to celebrate the life and works of ecologist Dr Mary Gillham.

Dr Mary Gillham (MBE) spent a huge amount of time exploring South Wales and recording all of the species she found, sometimes for personal interest, sometimes whilst educating extramural students and sometimes to record what species and habitats were present to provide evidence for protecting an area.

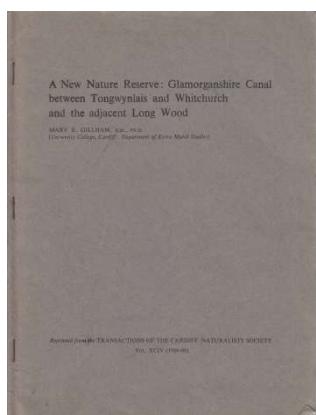

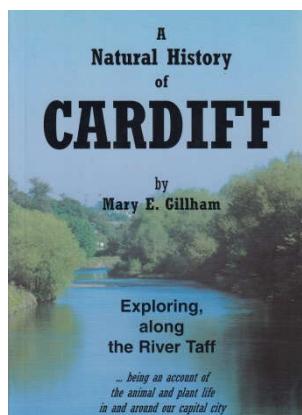

In this series of '*Walks with Mary Gillham*' we provide you with details of surveys Mary (and her colleagues) undertook, the species she recorded, and encourage you to visit sites and record what you can see. We would love to get an up-to-date species list so we can compare the two – will you find as much as Mary? Has the species composition changed drastically? Can you add new species to the list?

### Walk five: Forest Farm (and Glamorganshire Canal Local Nature Reserve)

**Carpark:** ST13828054. **Entrances:** ST132814, ST135807 and ST143803

The long history of Forest Farm, the Glamorganshire Canal and Long Wood is described in Mary's 'Natural History of Cardiff' book. From being an important thoroughfare for industry (by rail and canal) and being bisected by the new M4, Cardiff City Council with the help of groups such as the Cardiff Naturalists' Society, Glamorgan Naturalists' Trust, and Friends of Forest Farm, have managed to retain some of the historical features such as the Melingruffydd sluice and water wheel while managing the nature and habitats in way which supports a great diversity of wildlife.

Mary's found Forest Farm soon after arriving in Cardiff and remained fond of it throughout her life. She wrote the paper on the biological value of the reserve in 1967 (written during the Cardiff Naturalists' Society centenary – they will be 150 this year!) and continued to contribute to the Friends of Forest Farm newsletter well into the 2000s.

Included below is a list of species Mary and colleagues recorded over a 40 year period, comprising over 700 species!

The species were recorded and identified by a number of people including Mike Wiley, Idris Bowen; A.D. Tipper; Adrian Amsden; Mike Claridge; W Mapleson; A Pearcy; R. Jones; Amy Heathcote; M. Sutherland, Mary Thelwall, Linda Nottage, Ted Edwards, Phil Bristow, Mark Jervis and members of the Cardiff Naturalists' Society, Glamorgan Naturalists' Trust, and Friends of Forest Farm (<http://forestfarm.org.uk/>).
